

Understanding HLH

21 September 2019, 8.30am - 5pm
Birmingham Women's Hospital

**Join us for a day-long conference
exploring paediatric Hemophagocytic
lymphohistiocytosis (HLH)**

This one-day conference for medical professionals will explore the Diagnosis, Pathogenesis and Treatment of HLH (including Transplant).

Dedicated sessions will look at Central Nervous System HLH, Macrophage Activation Syndrome and HLH and explore the differences between Histiocytosis, LCH and HLH.

We will also look at Genetics and Laboratory Investigations, as well as HLH from an Immunologist's perspective. Medical Case Studies and Patient Journeys will illustrate the disease in context.

During the day, there will be chances to network with other professionals and to speak to families and children with HLH attending our parallel Families' Conference.

Interested in presenting a Case Study?

We will select five from entries received. Please contact jayashree.motwani@nhs.net with a proposal (max 500 words) by 1 September.
