**This course is aimed at senior haematology trainees and consultants with a desire to improve diagnostic skills, haematopathologists in training and senior scientists.**

# Haematological Malignancy Diagnostic Service (HDMS) Integrated Diagnostic Course

This first-in-class course for integrated diagnostic reporting in Haematology Malignancies will provide a collective, comprehensive, curated, coordinated, hands-on learning approach, in a multi-disciplinary format from experts in HMDS diagnostics.

The course will be in the form of clinical case reviews, encompassing progressive diagnostic testing, interspersed with short lectures about the different disciplines. It will encompass digital morphology of various specimens, immunophenotyping and an array of genomic tests (including FISH, g-banded karyotyping, SNP-arrays, next generation sequencing and whole genome sequencing).
